

CHETAN BAGUL

Full-Stack Developer (Java · Spring Boot · React)

Nashik, Maharashtra | 9503994074 | bglchetan@gmail.com

linkedin.com/in/chetan-bagul-661761202 | github.com/chetan-bagul | dukankhata.in

PROFESSIONAL SUMMARY

MCA graduate and full-stack developer who built and deployed DukanKhata, a live cloud POS and accounting SaaS, end to end: React 18 + TypeScript frontend on Vercel and a Java 17 / Spring Boot 3 + MongoDB backend on Docker and Render, with Razorpay payments and mobile-grade security. Strong in REST API design, secure authentication, offline-resilient UIs and performance tuning. Seeking a Full-Stack / Java Developer role.

TECHNICAL SKILLS

Frontend: React 18, TypeScript, JavaScript, Vite, Tailwind CSS, React Router v6, Axios, Angular, HTML, CSS

Backend: Java 17, Spring Boot 3, Spring Data JPA/Hibernate, REST APIs, Node.js/Express, Webhooks, Swagger/OpenAPI, Maven

Databases: MongoDB, MySQL, SQL Server

Security: JWT auth, HMAC SHA-256, AES-256 encryption, IDOR prevention, session management (OWASP MASVS)

DevOps & Cloud: Docker, Google Jib, Vercel, Render, AWS, Git/GitHub, CI/CD and Agile concepts

Testing & Tools: JUnit 5, Mockito, Postman, IntelliJ IDEA, Android

PROJECTS

DukanKhata™ — Cloud POS & Udhar Khata SaaS

React, TypeScript, Spring Boot 3, MongoDB

- Architected a dual-mode, multi-tenant POS and accounting SaaS for Indian retail SMBs: SMALL_SHOP (30-second daily closing, auto profit/loss badges) and LARGE_SHOP (itemized billing, GST A4 invoices, Udhar Khata ledgers, staff commissions).
- Engineered atomic split-payment checkout (Cash, UPI, remainder to Udhar ledger in one tap, 0% data drift), an automated end-of-day closing engine, and a localStorage offline fallback.
- Secured the app with Axios JWT interceptors, single-device session eviction, 401 auto-logout, AES-256 token encryption, anti-IDOR isolation, and Razorpay webhooks (order.paid, payment.captured) validated with HMAC SHA-256.
- Optimized with Vite code-splitting and React.lazy() (landing page vs Tailwind app); added GST invoice printing and WhatsApp (wa.me) sharing; deployed on Docker/Render (API, SSL) and Vercel.

Bank Management Services

Java, Spring Boot, Docker, Angular 19

- Built a Spring Boot REST backend for core banking operations using Spring Data JPA/Hibernate, with a layered controller, service and repository design.
- Documented all REST endpoints with Swagger/OpenAPI and managed dependencies and builds with Maven.
- Containerized the application with Docker and Google Jib for consistent, reproducible image builds across environments.
- Integrated an Angular 19 (TypeScript, RxJS) frontend and wrote JUnit 5 and Mockito unit and integration tests across service, controller and repository layers.

Fresh Feast — Food Delivery & Charity Platform

React, Node.js, MongoDB, Socket.IO

- Built a MERN food delivery and charity platform with User, Kitchen, Charity, Delivery and Admin roles, using an Express + MongoDB API and a React, Vite, Redux Toolkit and Tailwind frontend.
- Created separate customer, kitchen and delivery portals plus an admin dashboard to manage users, kitchens, dishes and orders.
- Implemented Socket.IO real-time sync so orders, delivery tasks, kitchen queues and earnings update live across all portals.
- Built a delivery claim workflow with a fixed Rs. 20 fee calculated server-side; ran MongoDB in Docker with seed scripts for demo menu data and an admin account.

EXPERIENCE

Web Developer Intern — XL Management Services (Remote)

Dec 2025 – May 2026

- Completed a 6-month remote internship building responsive frontend web pages with HTML, CSS, JavaScript, and PHP.
- Worked with a remote team on delivering and maintaining web features against requirements.

EDUCATION

MCA — SVKM Institute of Technology, Dhule (CGPA 7.2)

2025

BCA — IMRD College, Shahada (CGPA 9.0)

2022

CERTIFICATIONS

AWS (IT Vedant Training Institute) | JAVA Fundamentals (IBM)
